

# Tutorial on Pathology of the GI Tract, Pancreas and Liver

Weill Cornell Medical College

November 10-14, 2014

Walt Disney World Swan and Dolphin Resort  
Lake Buena Vista, Florida

## Course Goals & Objectives

This course is designed to update physicians on advances in our understanding of gastrointestinal diseases, address problems faced during the pathologic evaluation of tissue samples, and provide pathologists with a framework for interpretation of both histologic patterns of disease and results of molecular analyses. The course will be conducted under the direction of Rhonda K. Yantiss, MD at the Walt Disney World Swan and Dolphin Resort, located in Lake Buena Vista, Florida from **November 10-14, 2014**. The program will consist of lectures, case presentations and discussions designed to provide attendees with an in-depth discussion of diagnostic problems that arise when evaluating materials obtained from the gastrointestinal tract, pancreas, and liver, and inform them regarding the application and interpretation of immunohistochemical and molecular studies in the diagnosis and classification of these diseases. The Tutorial faculty will prepare a flash drive containing an extensive compilation of lecture notes and reference citations covering all of the topics presented at the Tutorial. A separate notebook containing all powerpoint presentations will be distributed as well.

## Target Audience
